

*Cadet's Handbook.* A Manual for Military Students at Colleges and Academies. By Captain John A. Lockwood, U. S. Army. Kansas Coty, Mo.: Hudson-Kimberly Co., 1903.

Captain Lockwood has here presented a useful little volume to aid the cadets of military academies and colleges in their duties. The interest in the subject of military education in this country is certainly increasing, hence the handbook will be welcomed by a large and constantly increasing class of students. .

The book considers not only the subjects of direct and immediate interest to such students but also subjects of general military importance, such as discipline, organization, correspondence, reports, rosters, courts-martial, military engineering, military hygiene, first aid to the wounded, camping and marching. It is well illustrated, particularly the chapters on *military engineering*, and *first aid*. The appendix contains the Articles of War and the blank forms necessary in company and post administration.

The last two chapters are devoted to West Point and the methods of obtaining commissions in the regular army.

It is altogether a useful, convenient and timely little volume, which should prove effective in increasing the scope of military knowledge, in a practical way in our ordinary academies and colleges, great and small, as well as in those devoted specially to military instruction.
