The second edition of "Bungalows, Camps and Mountain Houses" contains a number of added illustrations. THE ENGLISH COUNTRYSIDE. By Ernest C. Pulbrook. New York: Charles Scribner's Sons: 1915. Cloth, 8vo. Illustrated. 120 pages. Price, \$3.00 net.

We live in times when change is so rapid that customs and institutions of even a decade ago are no longer familiar. Everywhere the old is giving place to the new. However, this does not mean that old-time things have less interest for us. In truth, we seem more interested than ever in the things of yesterday even though change dominates our own era. In "The English Countryside," Ernest C. Pulbrook, the author, explains, one might say, why our English landscape is always beautiful. While the volume is not a collection of deep archeological facts and makes no pretence of setting forth results of any new historical research, it, nevertheless, reveals to the cultured reader in a delightful manner the charm of "The English Countryside" as it can be recorded.
